

Artsiom Lisouski

Middle Automation QA Engineer

(JavaScript | Playwright | Cypress | WDIO | Selenium)

I'm a motivated software QA engineer with an experience of 3 years in Desktop and WEB Testing fintech software.

I have practical experience in manual and automation testing, executing different types of testing, setting up processes for newly created apps as QA from the beginning to the release in production.

Regularly I help to improve testing processes and processes in a team. My responsible and proactive approach to work helps to mitigate risks and deliver releases without critical issues.

WORK EXPERIENCE

IT-Academy, Minsk – JS automation QA engineer

january 2024

Course Project: I have developed e2e and api autotests for the online store. The following technologies were used in the work: node.js, Playwright, jest, GitHub, Jenkins, Chrome DevTools

VADAROD, Minsk – QA team lead/manual and automation QA engineer

june 2021 – present

I worked on a fintech project: software for cash transactions, software for retail (bank cards, deposits, loans). Testing of POS-terminals and electronic cashiers. Manual testing + automation on our own framework in Groovy and Java languages. Led a group of 7-10 testers (manual and automated). I was engaged in the formation of a test plan, regression testing, distributed the load, controlled the quality, and prepared reports with test results.

A1QA, Minsk – manual QA engineer

april 2021 – may 2021

Internship

EDUCATION

Automated JavaScript testing (powered by EPAM) – IT-Academy, Minsk

september 2023 – january 2024

Performance Testing – Test Planet, Minsk
